

6516207146.txt

I am a satellite radio subscriber and find the variety of content available enjoyable and interesting. I often use the insatant traffic and weather reports and find these reports useful. These reports are available while driving and could lially prove life saving in a weather or traffic emergency. To eliminate this service is unfair and misguided. Even if a similar service were to be made available by traditional broadcasting, receiving these reports would be impossible in many rural and mountainous areas. Please oppose HR 4026. Thank you.
